

C320 Optical Module

Overview

ZTE ZXA10 C320 OLT (ZTE C320) is a compact, dense full-service xPON converged optical access platform for next-generation optical access networks, and it supports GPON/EPON/P2P/10GEPON/XG-PON1 common platform access, ZTE ZXA10 C320 supports HSI, VoIP, IPTV, CATV, mobile. ZTE ZXA10 C320 OLT (ZTE C320) is a compact, dense full-service xPON converged optical access platform for next-generation optical access networks, and it supports GPON/EPON/P2P/10GEPON/XG-PON1 common platform access, ZTE ZXA10 C320 supports HSI, VoIP, IPTV, CATV, mobile. E C320 Optical Line Terminal (OLT) represents a space-constrained central office, remote cabinets, an multi-dwelling unit position delivers wire-speed GPON and XG-PON enterprise grade seamless GPON to XGS-P symmetrical services. With a switching module (SCUN) provides low airflow with dual-rotor fans. This specific hardware configuration represents a highly optimized, compact Optical Line Terminal (OLT) designed for high-density, space-constrained edge networking. Why: As global telecommunications operators and Internet Service Providers (ISPs) aggressively expand Fiber-to-the-Home (FTTH) and 5G. ZTE ZXA10 C320, a small size, full-service optical access convergent platform, provides carrier class QoS and reliable network to meet the services. Higher security assurance: ONT authentication, user ID identification, port isolation, address. Long-distance wide coverage: support OLT sinking, long-distance remote installation, mobile bearer, out-of-band and other non-dense access scenarios suitable for optical access of user groups such as parks, communities, enterprises, townships and villages Multiple networking modes: flexible.
