

Distribution Box External Line Inspection Table

AI Overview

A Distribution Box External Line Inspection Table systematically evaluates the safety, integrity, and compliance of electrical distribution boards, focusing on external lines, mounting, labeling, and protective measures.

Key Components of an External Line Inspection Table

- General Information
- Distribution box location and identification
- Date of inspection and inspector name
- Type of distribution board (e.g., 220V, 380V)
- Approval or reference number for inspection
- Physical Condition
- Check for corrosion, rust, or physical damage to the enclosure ()
- Verify secure mounting and proper canopy protection ()
- Ensure doors, locks, and hinges are intact and functional
- Confirm ventilation openings are unobstructed
- External Line and Wiring
- Inspect incoming and outgoing cables for insulation damage or wear
- Verify that cable entries are sealed with glands to prevent moisture ingress ()
