

ETC distribution box

AI Overview

ETC distribution boxes are versatile power and control hubs designed to manage electrical connections for stage and theatrical lighting systems.

Overview

ETC (Electronic Theatre Controls) distribution boxes are engineered to safely distribute power and control signals to lighting fixtures and other stage equipment. They are commonly used in theaters, studios, and live event venues to centralize connections and simplify installation, maintenance, and customization .

Types of ETC Distribution Boxes

- **Gridiron Junction Boxes:** Mounted above the stage, these boxes provide a transition from conduit to multi-cable systems using tension-clamp terminals. They are compact, versatile, and suitable for custom projects .
- **Electronic Control Plug-in Boxes (ECPBs):** These allow lighting controls to connect and operate lighting and other equipment. They support industry-standard protocols like DMX512 and Ethernet, as well as houselight and remote control devices .
- **Connector Strips:** Designed for easy shipment and installation, these strips often include built-in DMX or Ethernet connections for streamlined integration .
- **Edison Outlet Boxes (5-20R):** These provide standard electrical outlets for powering stage equipment and can be purchased individually or in sets .

Features and Benefits

- **Customizable:** ETC distribution boxes can be tailored to specific installation needs, including the number of circuits, type of connectors, and mounting orientation .
