

Fiber Optic fusion splicer IF5-5

Overview

INNO i5 Fusion Splicer boasts the largest battery (7000mAh) for up to 400 cycles, core alignment, 4s splice, 13s heating, and a 5" touch screen, combining power and precision. Explore the superior specifications of our product, designed with cutting-edge technology to deliver unmatched performance. With the advent of 5G, along with its associated increase in bandwidth capacity, there are optimistic signs of growth in industry forecasts. Fusion Splicing is a preferred way to join two fibers together by using heat. Whether the fiber was broken or not long enough, a fusion splicer will make your job easier. Prepared fiber ends are placed in the splicer and automatically aligned. Fusion splicers are essential for creating low-loss, high-performance fiber optic connections in telecom, FTTH, and data center applications.
