

Ftthst Fiber Optic Adapter Customization

AI Overview

FTTH fiber optic adapters can be customized in connector type, sleeve material, configuration, and housing design to meet specific network requirements.

Overview of FTTH Fiber Optic Adapters

FTTH fiber optic adapters are passive components designed to connect and align two fiber optic cables with high precision, ensuring minimal insertion loss and high return loss. They are widely used in optical distribution frames (ODF), terminal boxes, splitters, and subscriber access equipment for GPON, EPON, and other passive optical network architectures. Adapters are also referred to as fiber couplers or mating sleeves and are critical for maintaining stable optical signal transmission.
