

Huawei router cannot be plugged into fiber optic cable

Overview

If you do not have a modem and only a router with PON or ADSL port, try reconnecting the fiber optics or RJ-45 connector. Check the LED on both Internet and PON. In this case, perform the following to troubleshoot: Check the WAN port connection. On the Home page, check whether the "No Internet cable detected" message is. However, setting up a fiber optic connection to your router can seem daunting if you're unfamiliar with the process. Before. User Guide About This Document About This Document Purpose This document describes the RRU hardware and provides instructions in hardware installation, cable connections, hardware installation check, and hardware maintenance.
