

Malaysia 48-core Smart Building Fiber Optic Cable

AI Overview

48-core fiber optic cables in Malaysia are available in single-mode, armoured designs suitable for indoor and outdoor smart building applications, supporting high-capacity data transmission.

Overview

A 48-core fiber optic cable contains 48 individual optical fibers, allowing high-density data transmission for smart building networks, data centers, and enterprise infrastructure . These cables are typically single-mode (G652D) for long-distance, high-speed communication and can be armoured for enhanced protection against mechanical stress .

Key Specifications

- Cable Types: Armoured (GYTA, GYTS), suitable for burial, aerial, or duct installation .
- Diameter & Weight: Nominal diameters range from 10.3mm to 10.8mm, with weights approximately 80–120 kg/km depending on armouring .
- Environmental Tolerance: Operation temperature ranges from -40°C to +70°C, with high tensile strength and radial pressure resistance for outdoor or demanding environments .
- Bend Radius: Minimum static bend radius 15D, dynamic 30D, ensuring flexibility during installation .
