

Monaco 3-Year Warranty AI Server OSFP

AI Overview

Monaco AI servers leverage OSFP modules for high-speed AI networking, typically supporting 400G–1.6Tbps connectivity, with enterprise-grade warranties often extending up to three years.

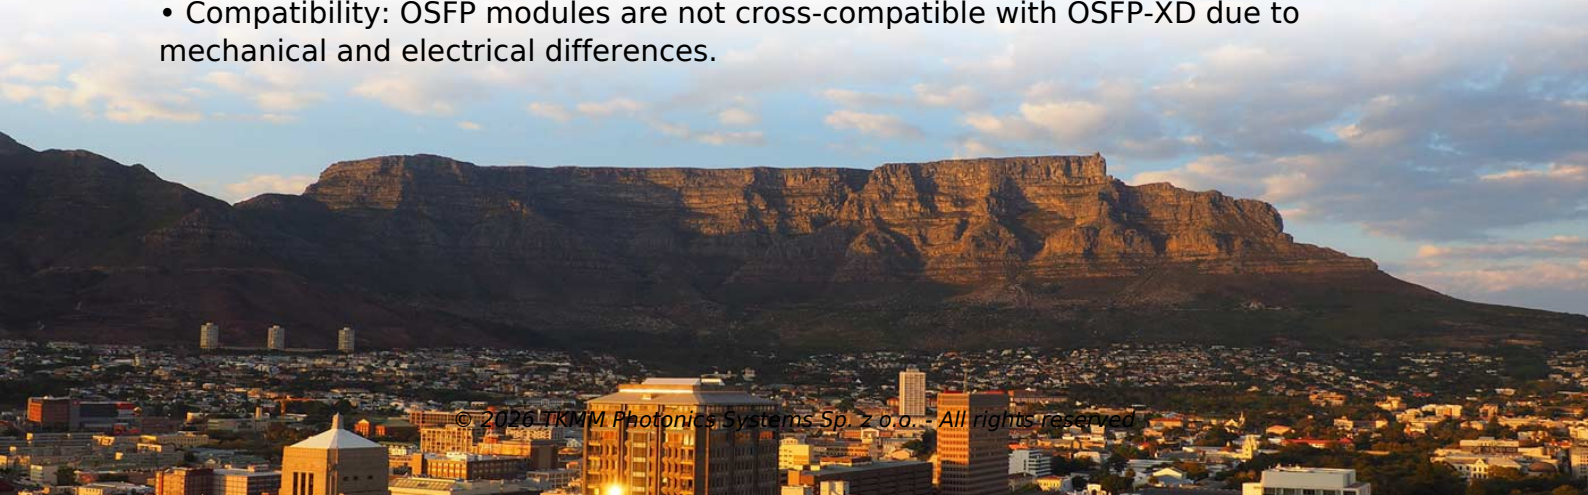

Monaco AI Server Capabilities

Monaco AI servers are designed for high-performance AI workloads, including GPU clusters for distributed training. They integrate with Monaco's AI platform, which automates data management, target account prioritization, and workflow execution, effectively replacing legacy CRM and manual processes (). These servers are optimized for low-latency, high-throughput operations, essential for large-scale AI model training.

OSFP Networking Integration

OSFP (Octal Small Form-factor Pluggable) modules provide the backbone for AI server networking. Key features include ():

- High-speed support: 400G, 800G, and up to 1.6Tbps per port.
- Variants: Standard OSFP with integrated heatsink, OSFP-RHS requiring external cooling, and OSFP-XD for extended density (16 lanes, doubling faceplate density).
- Compatibility: OSFP modules are not cross-compatible with OSFP-XD due to mechanical and electrical differences.
