

Price of Level 3 Distribution Box Wiring

AI Overview

Wiring a Level 3 distribution box typically costs between \$2,900 and \$6,400, depending on amperage, complexity, and installation requirements.

Cost Breakdown

Materials: The cost of the distribution box itself varies by capacity and features. For a Level 3 box (150–200A, three-phase, or commercial-grade), materials can range from \$1,100 to \$2,200 for high-quality, weatherproof, or modular units. Standard breakers typically cost \$5–\$25 each, depending on amperage and type. **Labor:** Installation labor for a Level 3 distribution box generally spans 8–24 hours, depending on complexity, rerouting, and whether a full service upgrade is required. Labor costs can range from \$1,600 to \$2,800, with higher rates in urban areas or for specialized commercial wiring. **Permits and Inspections:** Permit fees vary by jurisdiction, typically \$200–\$1,000, depending on whether the installation involves a service upgrade or meter relocation. **Total Estimated Cost:**

- Mid-range installation: \$2,900–\$3,200 (150–200A upgrade, some rerouting, outdoor weatherproof box)
- Premium installation: \$5,600–\$6,400 (200A service upgrade, meter relocation, full rewire, complex routing)

Factors Affecting Price

- **Amperage and Capacity:** Higher amperage panels and more circuits increase both material and labor costs.
- **Complexity of Wiring:** Additional control cables, three-phase power, or integration with smart systems can raise costs.
