

Price of Moisture-proof Distribution Box

Rear of the optical fiber distribution box

AI Overview

Moisture-proof distribution boxes typically range from \$20 to \$150 for standard residential or small commercial units, with prices increasing for larger, industrial, or highly weather-resistant models.

Typical Pricing

- Small residential or 1-row IP65 boxes: Around \$20–\$50, suitable for damp rooms, garages, or small outdoor installations. For example, a 1-row surface-mounted moisture-proof distribution box with space for 4 HP (DIN rail) and IP65 protection costs in this range and includes features like a transparent polycarbonate door, N/PE terminal, and pre-fabricated cable entries .
- Medium to large commercial units: \$50–\$100, often with multiple rows, higher amperage capacity, and enhanced durability for outdoor or industrial use .
- Industrial or custom waterproof boxes: \$100–\$150+, including IP65–IP68 rated enclosures, UV-stabilized plastics, DIN rail configurations, and options for bulk or pre-assembled solutions .

Factors Affecting Price

- IP Rating: Higher ingress protection (IP65–IP68) against dust, water, and UV exposure increases cost .
- Material: ABS, polycarbonate, or ASA plastics offer better weather resistance and durability, which can raise the price .
- Size and Capacity: More rows, higher amperage, or additional circuit slots increase cost. Small 1-row boxes are cheaper than multi-row industrial panels .
