

Price of Outdoor Optical Cable Traction Machine

AI Overview

Outdoor optical cable traction machines typically range from \$2,000 to over \$50,000 depending on capacity, type, and features.

Price Overview

The cost of an outdoor optical cable traction machine varies widely based on traction capacity, motor type, and additional features:

- Light-duty pneumatic or electric cable pullers with capacities around 200–500 kg generally cost \$2,000–\$5,000. These are suitable for small-scale fiber optic installations and light outdoor cable pulling .
- Medium-duty machines with capacities of 1,000–5,000 kg, often featuring DC motors or variable frequency drives (VFD), are priced around \$5,000–\$15,000. These are commonly used in cable manufacturing plants or larger outdoor projects .
- Heavy-duty hydraulic or high-power traction machines for large-diameter optical cables, with capacities up to 15,000 kg, can cost \$20,000–\$50,000 or more, depending on automation, electronic meters, and advanced safety features .

Key Factors Affecting Price

- Traction Capacity: Machines range from 200 kg to 15,000 kg; higher capacity significantly increases cost .
- Motor Type: Options include DC motors, VFD-controlled motors, gasoline engines, or hydraulic drives. Hydraulic and high-power motors are more expensive .
