

Price of installing a distribution box above ground

AI Overview

Installing an above-ground distribution box typically costs between \$300 and \$6,000, depending on amperage, materials, weatherproofing, and labor complexity.

Material and Box Type Costs

The price of the distribution box itself varies widely based on size, amperage, and construction material. Standard residential boxes range from \$100 to \$500, while commercial or industrial-grade outdoor boxes with weatherproofing and higher amperage can cost \$1,000 or more. Plastic boxes are the most affordable, whereas metal or weatherproof enclosures designed for outdoor use carry a premium due to durability and compliance with safety codes.

Installation and Labor Costs

Labor costs for installing an above-ground distribution box depend on accessibility, wiring complexity, and whether new circuits or conduits are required. Typical installation ranges from \$100 to \$300 for standard setups, but complex outdoor installations with weatherproofing, longer wiring runs, or smart meter integration can reach \$1,000 or more. Licensed electricians usually charge \$75-\$125 per hour, and installation time can vary from 1-3 hours for simple residential boxes to several hours for larger or multi-circuit systems.

Factors Affecting Total Cost

- Amperage and Capacity: Higher amperage panels (e.g., 200A) cost more than standard 100-125A units.
