

Sc Yin-Yang type optical attenuator specifications

Overview

The newly launched 25-year sc yin-yang attenuator is a precision passive optical component specifically designed for fiber optic communication systems. It offers selectable attenuation values of 1db, 2db, 5db, 10db, 15db, 20db, and 25db. It adopts a standard sc interface design. The utility model discloses an SC yin-yang type optical attenuator with high return loss and high accuracy. It comes in different types. The new 2025 sc type attenuator offers a wide range of 1db to 25db options, making it suitable for various applications including optical communication and fiber optic networks. Features a male-female plug-and-play design for easy installation, making it ideal for network engineering, data centers. This supplier mainly sells to Kenya, Jordan, and Indonesia, and operates as both a manufacturer and trader. They have a 100% positive review rate and 11 total positive reviews.
