

# Single-armored optical cable

## Overview

Armoured cables are designed for improved mechanical and rodent protection in direct bury applications. Featuring high performance Corning® glass singlemode fiber with low insertion loss (IL) and return loss (RL), and LC connectors, our cables offer fast, reliable data transfer. Specially designed compact structure is good at preventing loose tubes from shrin I steel wires ensure tensile strength, PE sheath protects cable from ultraviolet mall diameter, light weight and installation. Armored Fiber Optic Cable, sometimes referred to as MC Fiber Cable or BX Fiber Cable, is optimized to protect your fiber cable, avoiding any and all unnecessary network downtime as a result of outside interferences. In this modern day and age, the consequences of light attenuation, which could. Techlogiks armoured Loose tube cables are the product of choice as the backbone in Outside Plant (OSP) environments. The rugged loose tube design offers reliable transmission performance over a. One of the most reliable and robust options available is the 24 strand single-mode armored fiber optic cable. Engineered to deliver exceptional signal integrity over long distances with minimal loss, this type of cable has become a cornerstone in telecommunications, enterprise networks, data.
