

Telecom fiber optic router cannot access the internet

Overview

If your router isn't connecting to the internet, here's the quick checklist: Check and secure all cables. Test the modem directly to isolate the issue. Review router settings (WAN/DNS/ISP login). Whether you're relying on a wired Ethernet setup or Wi-Fi, a broken connection can stem from various causes—from simple cable issues and. Make sure that the wire plugged into the router has an active internet connection It can be frustrating to find out that your internet connection has stopped working or is having a problem connecting to the router. What to do: Ensure the power cable is plugged in and. I need information on what settings I need to configure on my router to access Internet via fiber optic modem. As far as I understand, I need a PPPoE username and password to connect. I never received it from Telekom, as well as Access number (Zugangsnummer). Checking the router's Internet Protocol (IP) address is the key starting point — it tells you whether the problem is with the router itself or the modem. Each fix includes exact steps for every major operating system so you can follow along regardless of what device you are using.
