

What is a CDP distribution box

Overview

CDP Compact Fiber Distribution Box is used for splicing indoor 24 cable to the drop fibers for Optical Passive Network applications. This is a location in the form of URLs where the issuing CA's base certificate revocation list (CRL) is published. If revocation checking is enabled, an application will use the URL to retrieve an updated version of the CRL. URLs can use Hypertext Transfer Protocol (HTTP), LDAP, or File. A digital certificate, similar to an electronic ID, verifies the identity of a user, device, or service. CDP Series are able to accommodate Single SC duplex adapter interface for patching or 6 drop cables, and is designed for easy and efficient installation as well as. To put it in simple terms, a CRL distribution point is a shared location on the network that is used to store the CRL and certificates. This article describes how to set up and publish a. Now, as you know, right after we deploy our Enterprise Certification Authority (CA) server, the wizard has already configured the AIA and CDP extensions for our CA server (s) with some default settings or predefined settings if we used a CAPolicy.
